wm+a™

Autism and developmental exceptionalities

wm+a™
we make a difference

wm+a provides short and long-term support for children, youth or adults with autism and developmental exceptionalities.

We offer a range of behavioural intervention and support services that focus on improvement and learning as well as behaviour management. For a decade, wm+a has provided immediate support in crisis situations, and our experienced associates have successfully supported clients with both skill development and managing and reducing behavioural problems in schools, programs or at home.

Who Do We Support?

wm+a supports children, youth and adults with autism/developmental exceptionalities as well as individuals diagnosed with ADHD, Fetal Alcohol Syndrome or with mental health/behavioural disorders. Our clients are of varied ages, each with a unique set of needs, challenges and circumstances. Our objective is to provide each client with individualized service delivery, starting with matching the Associate's skill/expertise to the clients needs.

We offer a range of individualized services focusing on skill acquisition through to behavioural management. For a decade wm+a has been responsive in crisis situations, equally supporting our clients and our community.

Our Community Partners

wm+a is often a part of a multi-disciplinary team that works together to ensure that the high needs/at-risk population and their families are well supported. Our service coordinators ensure that clear goals and objectives are delivered and progress reporting provided.

With a scheduling team and a 24 hour response mechanism, we are working with our community to ensure that both pre-planned and emergency situations are well managed.

We make a difference

Parents

wm+a services are focused on supporting the parents - directly and indirectly. We offer flexibility of support for respite and other home and community-based activities.

wm+a likewise believes strongly in extending the teaching to the primary caregivers so that they could learn (and apply) the same strategies and techniques, thus enabling greater consistency in teaching and for their child.

As additional training, we welcome the parents' attendance to any of our workshops.

Our Associates

Our knowledgeable and competent associates enable us to uphold our philosophy of following best practices and ensuring accountability. This, alongside our experience in carefully ensuring associates' particular skills and abilities are matched in relation to every clients' needs, has earned wm+a our longstanding reputation for excellence.
